*The easiest way to own a
new Yamaha piano*

bSeries | Simply better value

Natural beauty

A piano is so much more than a musical instrument. It becomes part of your life and, well chosen, will be with you for life.

A hundred years of accumulated knowledge has been condensed into our most affordable piano ever. No corners were cut. No compromises made in materials or workmanship. We simply designed a fully-featured Yamaha piano, but at a lower price.

Owning a NEW Yamaha b Series piano assures peace of mind and low maintenance costs. Each instrument leaves our workshops in optimum condition with the highest levels of quality control and is prepared for a lifetime of service, whether it's in the family home, apartment or institution.

The b Series, like all Yamaha pianos, are instruments of extraordinary natural beauty, combining art, craftsmanship and technology; a pleasure to play and to own.

b1

The new family member

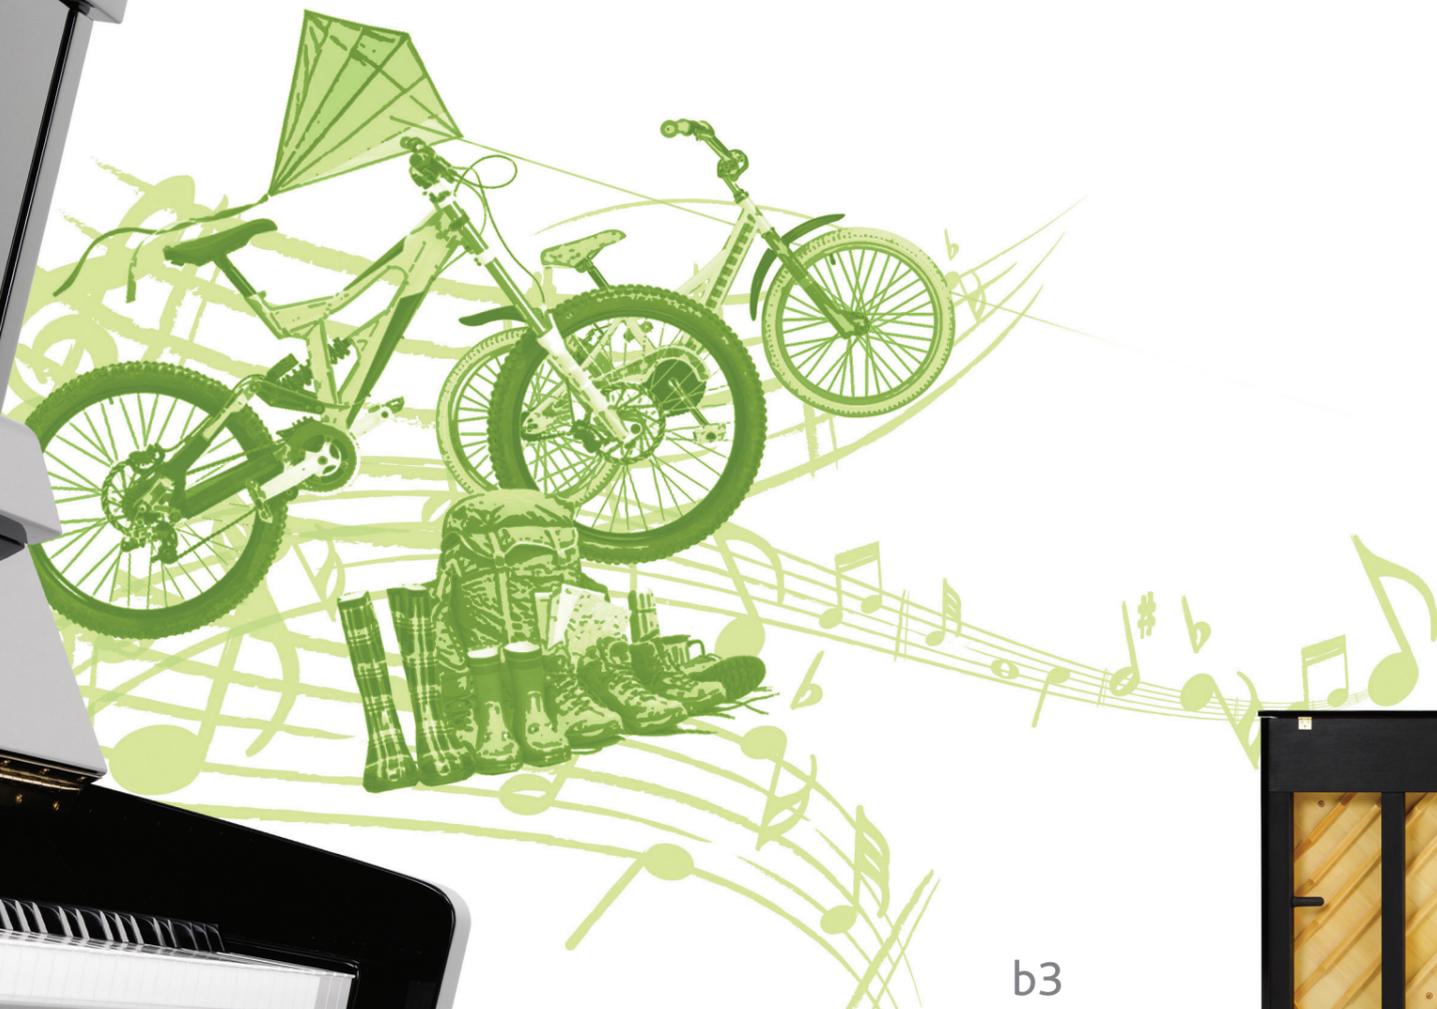

Exemplifying Yamaha's well-established design principles, the b1 redefines the word value. Undercutting lesser competitors whilst retaining Yamaha standards in every way, b1 offers the joy of new Yamaha piano ownership at a price that will astonish and delight.

bSeries | Simply better value

*White headphones are available as an optional extra.

b2

The perfect balance

With its 113cm cabinet height and solid construction, the new b2 delivers a superior sound through added depth and volume, yet still offers extraordinary value. And the elegantly detailed, traditional design ensures that the b2 looks right at home in your living space.

For the ambitious performer for whom affordability is a consideration, there is no better instrument.

Strength and durability

Both b2 and b3 models have been upgraded to feature a solid spruce soundboard with a reinforced crown, ensuring that the tone quality will remain consistent for many years. The sturdy backposts, which add strength and rigidity, are now attractively finished in black.*

*Available on b2 and b3 in polished ebony.

b3

The head of the household

At 121 cm high, the new Yamaha b3 is the largest and most tonally rich of the b Series range. It enjoys the additional strength and performance benefits of five back posts supporting a specially selected soundboard. Lacquered for enhanced high-end clarity, the b3 soundboard is designed to offer optimum tonal characteristics within a cost-effective and stable structure.

Form and function

Also upgraded on the new b2 and b3 instruments are the castors, which enable the easy movement of these substantial instruments.

b

The silent option

Yamaha b Series pianos are now available fitted with the industry standard Yamaha SG2 Silent System. When the silent function is activated, the hammers no longer hit the strings and instead, a digital tone module reproduces the sampled sound of a Yamaha grand piano through headphones, allowing 24 hr practice. Additionally, thanks to MIDI compatibility, Yamaha Silent pianos can be connected to external voice expansion devices, and also to PCs and iPads/iPhones, taking advantage of the latest Apps such as "Piano Diary." You can also connect the audio outputs to Hi-fi-Systems, mobile audio devices or external speakers.

The SG2 Silent System uses stereo sampling to realistically recreate the sound of an acoustic instrument. Digital technology is used to record the individual notes of a Yamaha CFIIIS concert grand piano, and high-quality digital filter technology is then applied to the recorded audio samples. Because our stereo sampling method captures dynamic nuances by recording samples at various playing strengths, the tone of the sound recreated varies with playing strength, just like an acoustic piano.

SILENT SYSTEM **SG 2**

| | | |
|---|----------------------------|---|
|  | CFIIIS Silent Sound | The amazing sampled sound of Yamaha's CFIIIS full-size Concert Grand |
|  | AWM Sampling | Stereo Advanced Wave Memory sampling accurately reproducing the dynamic nuances of playing at different strengths |
|  | 10 Different Sounds | Piano, Electric Piano 1 and 2, Harpsichord, Vibraphone, Celesta, Pipe Organ, Jazz Organ, Strings and Choir |
|  | 64 Note Polyphony | Up to 64-notes can be played simultaneously for a superb, real piano experience |
|  | 30MB Wave ROM | For many sounds, longer samples and multiple velocity layers |
|  | Apps | Connect to your iPad® and use Apps such as PianoDiary to monitor your progress with daily recordings |
